Page created at [North Carolina State University](#).

How to clean the FG-05 machine

This section gives you all the information you need to clean your ice cream machine.

In order to clean your machine, you will need the following:

- Water
- Detergent
- Gloves
- Dirty machine

Clean the machine only when it's dirty... duh!

1. Prepare the machine

Always unplug the ice cream machine before cleaning or servicing it.

2. Clean and clean more

How to fix the FG-05 machine

This section gives you all the information you need to clean your ice cream machine

If the machine ain't broken, don't try to fix it.

1. Open the machine by kicking its right side.

Always unplug the ice cream machine before cleaning or servicing it.

2. Determine the problem.

- If the machine was making an ugly noise, then replace the flux capacitor.
- If the machine was not working at all, then replace the power element.

3. Evaluate the problem.

Problem	Solution
Ice cream is sour	Clean the filter
Ice cream is yummy	Well, that's not a problem, Einstein!
